

Title

IPA Goes Local: Providing Whole-Person Care for People Living with Dementia

Course Description:

Participants in this session will experience aspects of living with dementia from the perspective of a patient and their caregivers through a virtual reality simulation. This will be followed by a discussion and exploration of the pharmacy team's role in providing person-centered care that considers cultural, structural, medication-related, and disease-related factors to 1) meets the unique needs of each patient and their caregivers and 2) address disparities in care for people with dementia.

Date

05/14/24

Time

7:00pm CST

Location

Quad Cities, IA

Learning Objectives:

Upon successful completion of this knowledge-based course pharmacists and pharmacy technicians should be able to:

1. Identify key factors to evaluate and align a patient's medications with their needs across the trajectory of a serious illness.
2. Discuss how socioeconomic factors and health-related beliefs affect health care utilization and wellbeing in patients and caregivers with dementia or other serious illnesses.
3. Outline a person-centered approach that addresses the unique needs of each patients living with a dementia and their caregivers, that includes resources and networks of interprofessional colleagues.
4. Recognize the need for cultural humility and compassion when caring for people with dementia or other serious illnesses.
